DETAILED ACTION

1. The Applicants' preliminary amendments filed on October 23, 2003 and October 8, 2004 were received. Claims 1-15 and 18-20 are deleted. Claims 16-17 are amended. Claim 21 is added. Now, Claims 16-17 and 21 are pending.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 16-17 and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gaylord (US 3 808 178).

Gaylord discloses a method of producing ophthalmic devices obtained by casting, molding or machining a polymeric composition produced through the polymerization of a polysiloxanylalkyl ester monomer containing aromatic based groups and alkanol ester comonomers. (col. 1, line 18 to col. 3, line 44 and Examples). Gaylord further teaches the use of a hydrophilic monomer (col. 4, lines

50-62). Gaylord further teaches the use of methyl methacrylate (col. 3, line 29).

Gaylord further teaches the use of a crosslinking agent such as ethylene glycol dimethacrylate, butylene glycol dimethacrylate, neopentyl glycol diacrylate, etc.

(col. 5, lines 6-14). Gaylord is silent on a method of using the ophthalmic devices.

It is well known to implant ophthalmic devices within an eye. Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention was made to implant ophthalmic devices within an eye.
